

HOSENUZZAMAN

MERN-Stack Developer

Dhaka, Bangladesh | +880 1884692142 | hosenuzzaman2018@gmail.com

[LINKEDIN](#) | [PORTFOLIO](#) | [GITHUB](#)

CAREER OBJECTIVE:

Full-Stack Developer focused on the MERN ecosystem, specializing in high-performance frontend interfaces with React/Next.js and efficient backend services using Node.js and MongoDB. Dedicated to turning complex problems into user-friendly digital solutions.

SKILLS:

Frontend: HTML5, CSS3, Tailwind CSS, JavaScript ES6+, React, Next.js, Framer Motion, HeroUI

Backend: Node.js, Express.js, REST APIs, BetterAuth, JWT, Stripe, Server-side rendering

Database: MongoDB Atlas, Environment-secured credentials

Tools: Git & GitHub, Figma, Netlify, Vercel, npm / Vite, VS Code

PROJECTS:

PulseBond — Blood Donation platform

[Live Preview](#) | [Frontend](#) | [Backend](#)

Tech Stack: React, Next.js, Express.js, MongoDB, BetterAuth, Tailwind CSS

- Built a full-stack blood donation platform (Next.js, Express.js, MongoDB) with role-based access control (Admin, Donor, Volunteer) featuring district and upazila-based donor search and Stripe payment integration.
- Implemented secure JWT-based authentication using BetterAuth with JWKS verification on the Express backend, including an admin user-management system for blocking users and managing roles in real-time.
- Developed a role-specific dashboard system with dynamic stats, donation request lifecycle management (pending → in progress → done), and a public-facing blood request board with filtering..

SportNest — Sports facility & ground booking platform

[Live Preview](#) | [Frontend](#) | [Backend](#)

Tech Stack: React, Next.js, Express.js, MongoDB, BetterAuth, Tailwind CSS

- Built a full-stack sports facility booking platform (Next.js 14, Express, MongoDB) with search/filter by sport type, automated price calculation across date/time/hours, and a My Bookings dashboard with cancellation support..
- Implemented facility management features allowing users to add listings with image upload (imgbb) and update or delete their own facilities, alongside protected private routes with persistent session handling on reload..
- Integrated BetterAuth for Google OAuth and email/password authentication, with toast-based feedback, loading states, and a fully responsive UI (framer-motion scroll animations, custom 404 page) across mobile, tablet, and desktop.
- Architected a dual-repo structure (separate Next.js frontend and Express backend), with BetterAuth session management and protected API routes throughout.

VerifiedHands — Local skilled-worker marketplace

[Live Preview](#) | [Frontend](#) | [Backend](#)

Tech Stack: React, Next.js, Express.js, MongoDB Atlas, BetterAuth, JWT, Tailwind CSS

- Built a full-stack job marketplace with React + TypeScript (frontend) and Express.js + TypeScript (backend), connecting local people with verified skilled workers in Bangladesh
 - Implemented secure authentication with role-based access control (Employer/Worker) using JWT and built features like worker profiles, job posting, search/filter, and rating system.
 - Designed a responsive UI with Tailwind CSS and Framer Motion animations ; integrated MongoDB with Mongoose for data persistence
-

EDUCATION:

Bachelor of Science in Computer Science and Engineering (BSc in CSE)

Eastern University

2022 – Present

CERTIFICATION:

[Complete Web Development](#) Programming Hero Nov 2025 – June 2026
